

# Anti-Bias and Equity Statement

---

Pooraka Community Kindergarten promotes an environment of curriculum and programs where children and families can expect to be given access to quality care and education.

Some individuals and groups may experience particular disadvantage in society due to their race, ability, culture, language background, socio-economic status, location or gender and often in a combined form.

Our goal for every learner is that their membership of a particular group will not limit their participation or outcomes.

At Pooraka Community Kindergarten children can see and explore differences between people. Staff will challenge attitudes which discriminate and will actively promote understanding of similarities.
